Dimensions are inches unless noted and subject to manufacturing tolerances.

Overview:

Cerro Advantage Tube is a copper tube that has been engineered specifically for installation in copper press systems. It delivers significant total installed cost savings by eliminating the need for a copper press coupling and its associated installation steps. The labor savings are significant as the product installs twice as fast as traditional tube and press fittings.

Benefits:

- Advantage Press Tube has Perfect-fit design with superior alignment compared to tube and couplings, significantly reducing deflection and warping
- Fewer press point joints resulting in a more seamless system reducing chances of leaks
- Built-in stop for faster, easier installation
- Factory deburred and finished male end
- Ease of handling of product

Approvals:

IAPMO listed, File Number 5955, as meeting the requirements of the IAPMO PS 117-2008 and the Uniform Plumbing Code. NSF/ANSI 61. Lead Free NSF Legislation Compliant. Lead Free WQA Legislation Compliant Compliant with American Recovery and Reinvestment Act of 2009. Made in U.S.A.

Applications:

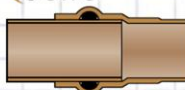

Potable water system, chilled and hot water systems, non-potable process water systems and vacuum

Pressure/Temperature Rating:

Pressure rated at 200 psig (13.8 bar) cwp over a temperature range from 0° F to 250° F (-18° C to 121° C) non potable treated and 32° F to 250° F (0° C to 121° C) potable water when pressed according to instructions

Pressing Tools:

Advantage Press Tube has been extensively tested, and works with commercially available tools including; Stanley Virax, Ridgid, REMS and Rothenberger
